

HA BACH VIET HOANG

Birthday: 21/09/1998

Contact

(+84) 0889992798

hahoangdut@gmail.com

Ho Chi Minh City, Viet Nam

Education

- Da Nang University of Science and Technology

Mechanical Engineering

Jul 2016 - Dec 2020

Skills

- **Softwares:** Fusion, AutoCAD, Microsoft

Office, Revit, Naviswork.

- **Skills:** Teamwork, Analytical thinking,

Process Optimization, Team

Management, Quality Management.

- **Languages:** English (TOEIC 600+),

Japanese

Portfolio

- Please see attachments for more details:

Accomplishments

- First Prize Winner - National Science and Engineering Competition (2015-2016)
 - This project aims to improve household waste classification by applying the Foucault current effect to identify and separate non-ferrous metals. The proposed model consists of a comprehensive waste management system, including household bins for waste segregation, smart public waste containers to enhance collection efficiency, and conveyor belt mechanisms at waste treatment plants, where metals are automatically extracted using Foucault-induced heating.

Experiences

Mechanical&Electrical Supervisor

Coteccons Group

Feb 2021 - Present

General Responsibilities

- Supervise MEP and fire fighting works at construction or industrial sites. Ensure compliance with project specifications, safety regulations, and local codes.
- Coordinate with contractors, consultants, and other departments.
- Review and approve method statements and shop drawings.
- Optimize designs for manufacturability, assembly, and material efficiency..

Mechanical Systems

- Installation and supervision of HVAC systems.
- Experience in HVAC system design review and optimization (load calculation, duct sizing, pipe sizing).
- Familiar with chilled water systems, split units, VRV/VRF systems.
- Maintenance and troubleshooting of mechanical equipment.
- Conduct testing & commissioning (T&C) for HVAC systems.

Plumbing Systems

- Supervision of water supply, drainage, and sanitary systems.
- Experience in plumbing system design review (hydraulic calculation, pipe sizing, pressure analysis).
- Installation of pumps, tanks, valves, and pipework.
- Ensure compliance with plumbing codes and health standards.
- Perform pressure testing, leakage testing, and system commissioning.

Fire Fighting & Fire Alarm Systems

- Installation and testing of fire suppression systems.
- Review and coordination of fire protection system design in compliance.
- Supervision of fire pump rooms and hydrant systems.
- Conduct testing, flushing, and commissioning of fire systems.
- Coordinate with authorities for inspections, approvals, and handover.

Experiences

Quantity Surveying (QS) & Material Control

- Experienced in quantity surveying, progress measurement, and payment documentation for mechanical and MEP projects.
- Coordinated with internal departments and suppliers to ensure timely procurement and delivery of materials according to project schedules.
- Controlled and verified the quantity and quality of materials and equipment delivered to site, reporting discrepancies and project status to site management and head office.
- Collaborated with suppliers, subcontractors, and project teams to prepare material documentation, certificates, and supporting records required for internal payment processes and client approvals.
- Prepared and submitted material samples, coordinated inspections, and obtained approvals from clients and consultants prior to installation.
- Organized material inspection and acceptance procedures with clients, consultants, and relevant stakeholders.
- Monitored material storage, preservation, and utilization on site to ensure compliance with project requirements and minimize wastage.
- Prepared quantity take-offs, work measurement reports, progress claims, and final account documentation for client and consultant review.
- Coordinated with project teams, consultants, and clients to expedite payment certification and project close-out processes.
- Maintained accurate records of material consumption, procurement status, and project cost tracking to support budget control and cost management.

Design & Engineering

- Review and validate shop drawings, as-built drawings, and design submissions.
- Perform technical calculations (cooling load, pump head, pipe/duct sizing).
- Coordinate BIM models (Revit/Navisworks) to detect clashes and optimize design.
- Value engineering: propose cost-effective and efficient design solutions.
- Ensure design compliance with international standards

Quality Control

- Develop and implement Inspection Test Plans (ITP) and QA/QC procedures.
- Conduct material inspection and ensure approval.
- Monitor site works to ensure compliance with approved drawings and specifications.
- Prepare and manage inspection requests, checklists, and QA documentation.
- Witness testing & commissioning and ensure proper documentation for handover.
- Maintain quality records and coordinate with QA/QC teams and consultants

Soft Skills and Tools

- Proficiency in AutoCAD, Revit, Navisworks for reviewing drawings.
- Knowledge of project management tools (MS Project, etc.).
- Strong leadership and communication skills.
- Problem-solving on site and coordination with cross-functional teams.

Projects:

- APEC Convention and Exhibition Center
- LEGO Manufacturing Vietnam
- Vinhomes Grand Park HCMC
